Action number: **CA1930: Fintech and AI in Finance**

Grantee name: **Galena Pisoni**

Virtual Mobility Details

Title: Position paper aimed at regulators and policy-makers, on methodology for testing AI techniques in real-time

Start and end date: 29/03/2023 to 30/05/2023

Description of the work carried out during the VM

Description of the virtual collaboration and activities carried out during the VM, with focus on the work carried out by the grantee. Any deviations from the initial working plan shall also be described in this section.

(max. 500 words)

The coordination of the work was done primarily via email and dedicated small groups and one on one talks to organize the writing of the paper. All members were approached, and there was an interest of an additional member (not in the original plan of writing of the proposal) to join the shared writing, resulting in total in 6 countries team to write jointly, polish and deliver the final version of the deliverable. The paper was sent for the special issue on "Social Welfare Computing" of the Electronic Markets journal.

Description of the VM main achievements and planned follow-up activities

Description and assessment of whether the VM achieved its planned goals and expected outcomes, including specific contribution to Action objective and deliverables, or publications resulting from the VM. Agreed plans for future follow-up collaborations shall also be described in this section.

(max. 500 words)

The main outcome of the virtual mobility grant was the journal article, and the paper was finished even before the initially proposed end date of the Virtual Mobility Grant. As the contributed material was too much for a single article, and all the contributed material was of a very good quality, the follow-up steps will foresee the conceptualization of another article, with a focus on cyber focus, pertinent EU regulation, and the role of new technologies (AI and blockchain in primis) in regulatory oversight.
